ERIK ESPUÑES JUBERÓ

SOFTWARE ENGINEER

ABOUT ME

I am a dedicated and driven programmer committed to continuous learning and problem-solving. I take pride in delivering effective, clean, and maintainable code, believing that quality is the foundation of sustainable development. I ensure that every project adheres to best practices and industry standards. Guided by the principle, "Good, better, best. Never let it rest. Until your good is better and your better is best," I consistently strive for excellence and am motivated to achieve the highest level of quality in my work.

EXPERIENCE

2022

-

2025

Container xChange

Software Engineer (Intern to Mid)

- Started career as an intern, focusing on web scrapers and data extraction, building foundational programming skills.
- Promoted to Junior Software Engineer, developing microservices with Spring Boot and collaborating with cross-functional teams.
- Transitioned to Fullstack Developer, contributing to both backend development and frontend work with Angular.
- Gained experience in designing scalable, maintainable systems and ensuring seamless integration within the architecture.
- Demonstrated adaptability and consistent delivery of reliable, high-quality software solutions.
